# WALK-IN MONITOR SYSTEM

Maximize Efficiency, Minimize Stress

Display may vary based on latest SmartRite software updates.

We have set the new standard in the walk-in refrigeration industry with the introduction of our SmartRite touch screen monitor. Designed to provide accurate monitoring of your walk-in cooler and freezer temperature, relative humidity percentage, with an advanced water-resistant touch screen interface.

The SmartRite monitor will help maintain your perishables at optimum quality and safety, while reducing energy costs. The monitor incorporates a range of functions including Bluetooth® and WiFi capabilities, keeping the information available at your fingertips 24 hours a day.

SMARTRITE CLOUD SERVICES

SmartRite eliminates the need for manual data entry, streamlining your tasks and improving overall efficiency. You can easily access historical data and generate automated HACCP reports, ensuring you stay in control of your operations at all times.
