ICS Advantage

Say goodbye to traditional brick-and-mortar construction headaches. By moving walk-ins outdoors, you save approximately \$525 per square foot in construction costs. Imagine the savings when a 20' x 10' walk-in is relocated outdoors, slashing construction expenses by a staggering \$105,000. Embrace efficiency without compromising quality.

Engineered for seamless one-piece construction, our walk-ins boast a minimum 4" UL Class 1 polyurethane foam insulation, ensuring optimal temperature control. With factory-installed and tested refrigeration and electrical components, each unit arrives pre-assembled and ready for immediate use. Being fully operational in just 2-4 hours.

There is no need to hire an excessive number of trades. With ICS walk-ins an electrician can simply connect incoming power and the General Contractor can take care of any necessary flashing.

Choose ICS walk-ins for swift and hassle-free installation without compromising on quality.
